

WHEEL/POWER CHAIR TRAK[®] SYSTEMS

LIGHTWEIGHT— EASY TO USE

The Trak[®] system from Handi-Ramp[®]—a full range of lightweight, portable wheel and power chair tracks (or channel ramps) designed to be convenient and easy to use. Traks are manufactured from durable, extruded aluminum with a non-skid surface for decades of useful service. They are available in a range of lengths corresponding to the single- and multiple-step barriers commonly encountered in everyday living.

LIGHTWEIGHT

The Trak line now includes the lightest, most portable wheelchair track products available on the market today. Our new 30" Traks weigh only 4½ lbs. per track, while the new 45" unit weighs only 6½ lbs. per track. Yet both systems will easily accommodate weights of up to 600 lbs.

We have redesigned our 60" and 90" Trak systems to be lighter and more portable. With per-track weights of only 9 lbs. for the 60" Traks and 13½ lbs. for the 90" Traks, Handi-Traks have been designed to be truly portable.

EASY TO USE

All Handi-Trak systems feature a 6¾" width (inner dimension) to accommodate the widest wheelchair offset and camberage. There are no difficult-to-manipulate buttons or telescoping parts to separate or catch on wheels.

All Traks feature Easy-Carry Handles that reduce stress on fingers and wrists. Traks 60" and longer are hinged for additional convenience and portability.

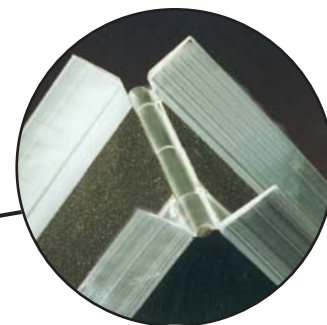

Simply unfold your Handi-Traks to use them and then fold them to carry or store them.

Handi-Trak systems are convenient, portable tracks available in a range of lengths for maximum accessibility.

Easy-carry handles reduce finger and wrist stress.

Durable welded hinges make Traks easy to use - Simply unfold to use and fold to store or carry.

HANDI-TRAKS HAVE A WIDE VARIETY OF USES

Ten foot long Handi-Traks work with the narrow door of an RV. (Make sure the wheelchair will fit in the door).

Many of today's minivans have doors that are too narrow to accommodate a standard size ramp. The Handi-Traks can adjust to any door width.

Handi-Traks can save your back when loading and unloading your vehicle. They are easy to use and easy to store when not in use.

Handi-Traks can be designed for special uses. These traks were designed for use with an AMBULANCE and have a capacity of 1200 lbs. Call us to discuss your special need.

We have a specially designed Handi-Trak for SEGWAY owners. These Traks make easy to transport your SEGWAY

"The nicest thing about the Handi-Traks is how easy they are to use. I had a pair of the telescoping tracks and I was always getting my fingers pinched and I could never get them to close. With the Handi-Traks are no buttons to push and they simply fold in half."

*Debbie Walice
North Hills, California*

"I've been using a pair of Handi-Traks very successfully for the past 25 years. They have served me well."

*Mark Bair
Hope, Indiana*
