Handi Curb Cut Ramp

The Handi Curb Cut Ramp provides instant accessibility at curbs, enabling municipalities to meet ADA requirements at a cost substantially below that of concrete reconstruction. Made of 1/8" thick reinforced steel with hinged side wings that allow traffic from all sides, the ramp is powder coated and dimpled to provide a high traction, non-skid surface in any weather. The curb cut ramp is portable by design so that it can be placed at locations with immediate needs and relocated when permanent concrete cuts are made. Installed in less than 30 minutes, the ramp is available for purchase or short-term rental. Contact Handi-Ramp at (800) 876-7267 or visit www.handiramp.com/curbcutramps.htm.
