

# ALUMINUM PORTABLE RAMPS (ALPR)

# Handi-Ramp®

## SPECIFICATIONS

### DESCRIPTION

Handi-Ramp's Aluminum Portable Wheelchair Ramps (ALPR) are available in 5, 6, 7, 8, 10 and 12 foot lengths. Aluminum construction with raised buttons provides an excellent non-slip surface for safety and traction. Aluminum wheelchair ramps fold in half and have a weight capacity of 750 lbs. Standard width of the ramp is 30 inches making them the sturdiest and easiest to use portable wheelchair ramps available. All models of the ALPR ramps fold for convenience and portability. A removable hinge pin comes standard on our 10 foot and 12 foot folding wheelchair ramps, aiding you when moving the ramp. For added stability a center support leg is standard on the 12' model, which is custom built to your specifications.

Additional accessories available for all models of the Aluminum Portable Wheelchair Ramps (ALPR) include: wheel kit (for rolling transport) and removable hinge pins (allowing the ramp to separate into two sections). Custom sizes and capacities are also available.

### MATERIALS AND CONSTRUCTION

- All aluminum welded construction
- Flooring: 0.125" non-skid aluminum 5052-H32
- Angle and square tubing: aluminum 6061-T6
