

## SPECIFICATIONS

### DESCRIPTION

Curb Cut Ramps from Handi-Ramp create immediate access where a curb ramp is needed in order to meet ADA (Americans with Disabilities Act) access requirements. These custom made ramps, can be installed in minutes, providing where curb cuts are not already in place or permanent installation is not feasible. Curb Cut Ramps are cost effective and are perfect for temporarily meeting ADA accessibility standards.

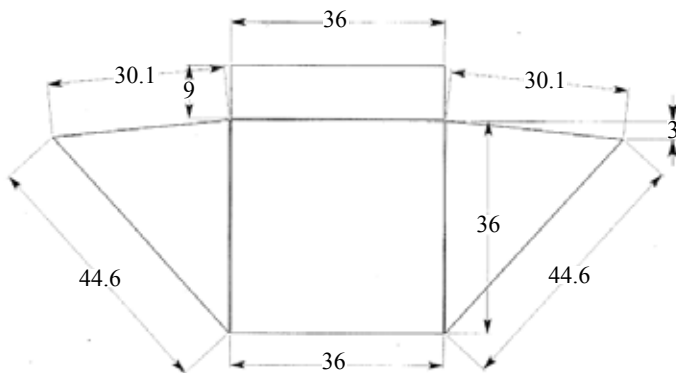

Design of the Handi-Curb Ramp complies with Section 4.7.6 of the Americans with Disabilities Act (ADA). City managers and event coordinators have used these curb ramps to create temporary access for special events such as parades, elections and sporting events. Curb Cut Ramps are light weight enough to be moved by a two man crew making them convenient and portable.

The Curb Cut Ramp is built to withstand the weight of a vehicle. Its heavy-duty steel construction is designed for durability and longevity. A powder coated finish keeps the Handi-Curb looking new and rust free. Stainless steel hinges along the seams of the ramp allow it to be adjusted to fit any curb at a variety of heights. Side wings protect users by allowing safe access from all angles on-to and off-of a curb. For superior traction a raised button surface is used which maintains its traction through ice, water and snow. Custom sizes are available.

### MATERIALS AND CONSTRUCTION

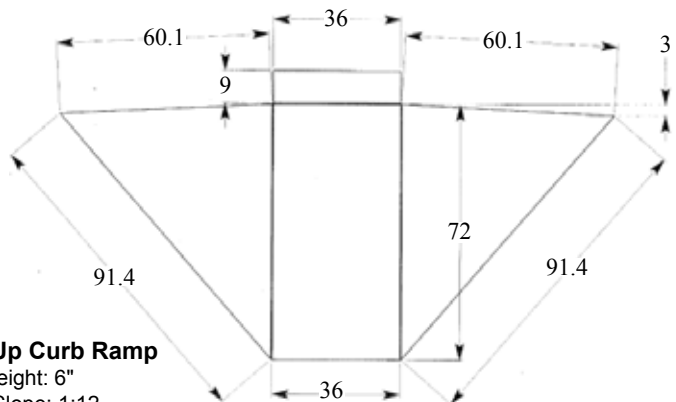

- All steel welded construction
- Flooring: 11 gage steel non-skid HRP
- Angle and square tubing: CRS

### MEASUREMENTS

#### Built-Up Curb Ramp

Curb Height: 3"  
Ramp Slope: 1:18  
Wing Slope 1:10  
Usable Range: 2"-4"

#### Built-Up Curb Ramp

Curb Height: 6"  
Ramp Slope: 1:12  
Wing Slope 1:10  
Usable Range: 4"-8"
