

DOCK LEVELERS

Lo Dock Leveler

Handi-Ramp's Lo-Dock Leveler can raise your docks height up to 11" with no expensive alterations necessary. Standard models come in 3", 5", 7", and 9" heights however we are able to manufacture custom sizes according to your specific needs.

Made from strong steel construction and MIG welding ensures that the Lo-Docks are built to last. With Lo-Dock your freight is always handled in a safe grade and can easily be installed on any concrete dock without welding or modifications. Refrigerated lip is optional.

- Raises dock to proper working height
- Fully assembled; no welding or modification required

Edge of Dock Leveler

Handi-Ramp's Edge of Dock Leveler is designed to speed up the loading of dry or refrigerated trailers.

The advanced engineering design of latch assembly makes the Edge of Dock operate flawlessly time after time and ready to use in 20 seconds. Strong impact resistant steel construction provides years of service on even the busiest of docks

Designed to have a working range of 5" above and 5" below dock level, Handi-Ramp's Dock Leveler is positioned by lifting a self-storing handle and pulling the handle to the dock floor. The latch assembly activates the lip forward to the floor of the trailer as the handle is lifted. When released, the handle automatically returns to a stored position. Refrigerated lip is optional.

Capacities of 20,000 and 25,000 pounds and widths of 72" and 78" are standard, however Handi-Ramp is able to custom manufacture Dock Levelers to meet your specific needs.

- Automatically returns to stored position when truck leaves
- Self-Storing handle
- Bumper and bumper blocks included
