

THE CURB CUT SOLUTION

The Handi Curb ramp is a low cost solution to ADA compliance for curb cuts. This adjustable ramp allows traffic from all sides to ease up onto a curb. At any location, the Handi Curb ramp can be easily installed where curb cuts are needed. Its heavy duty steel construction is made for durability and longevity. The product features a powder coated finish to keep the Handi Curb looking new and rust free. Hinges along the seams of the ramp allow it to be adjusted to fit any curb at a variety of heights. A nice benefit of the ramp is that it is light enough to be moved by a two man crew in a matter of minutes to any location in where a curb cut is needed.

The Handi Curb ramp is strong enough to withstand the weight of vehicles.

The Handi Curb's high traction material makes it easy to maneuver in wheelchairs or on foot.

ADA Compliance

The design of the Handi Curb ramp complies with Section 4.7.6 of the Americans with Disabilities Act (ADA) and will enable building owners and municipalities to create access for people in wheelchairs without having to schedule a construction crew or hire contractors to pour new concrete for a curb cut. These ramps are available for purchase or for short term rental while waiting for a construction crew to complete concrete reconstruction. The side wings allow safe access on-to and off-of a curb.

Non Skid Surface

The Handi Curb ramp is made of reinforced steel and stainless steel hinges. The surface of the ramp is a high traction raised button material that maintains its traction through ice, water and snow.

The Handi Curb ramp's sloped design leaves it flush against the curb and unobtrusive to traffic.

Additional Uses for Handi Curb Ramp

Not only is the Handi Curb ramp the perfect solution for communities to solve their ADA (Americans with Disabilities Act) needs, the ramp also promotes safety for other members of society. Mothers with strollers, children on bikes, people on rollerblades, and other pedestrian traffic also benefit by not having to jump curbs to access the street and adjacent sidewalk.

The Handi Curb ramp lets mothers with strollers and bike traffic easily access sidewalks without having to jump the curb.

SIDEWALK REPLACEMENT KIT

Our temporary sidewalk replacement kit is made for any situation where a piece of sidewalk has been torn up. This ten by three foot sheet of high traction aluminum can be bolted into place across the sidewalk gap to create a temporary walkway. This temporary walkway helps foot traffic cross over potentially hazardous areas with ease. The sidewalk replacement kit is a low-cost temporary solution to costly sidewalk repairs and potential liability.
