

PORTABLE DELIVERY RAMP

Handi-Ramp®

FOR SEMI TRUCKS AND TRACTOR TRAILERS

The Portable Delivery Ramp for Semi Trucks and Tractor Trailers was developed by *Handi-Ramp®* to allow deliveries from trailers when no loading dock is available.

Moving product on and off semi-trailers and up and down loading docks is what this ramp does best. Standard size is 12 feet long with a capacity of 750 lbs, although custom sizes and capacities are available. This portable delivery ramp system folds in half and is easily maneuvered and set-up by a single individual being that the total weight of the ramp is only 100 lbs.

Don't have the cargo space to carry a Portable Delivery Ramp in your trailer? This ramp can also be transported under the trailer using the optional Mounting Brackets which can be attached without tools or welding to the I-beam frame of the trailer. The ramp then locks into these brackets which can be moved from trailer to trailer in just minutes.

Portable Delivery Ramps have become an effective tool in supporting driver safety, reducing workers compensation claims, and eliminating the need for lift gate delivery trucks in many situations.

PORTABLE DELIVERY RAMP

Handi-Ramp®

PORTABLE DELIVERY RAMP FEATURES

- 12 feet long by 24 inches wide, however custom sizes are available.
- Weigh approximately 100 pounds.
- Fold in half and will store under a trailer or in a space 7" x 28" x 81"
- Mounted wheel makes it easy for a single person to position the ramp
- Universal mounting hardware fits all trailers and can be moved between trailers in minutes without using any tools
- Will service trailer or loading dock heights ranging from 54 inches (maximum) to 36 inches (minimum). Custom ramps can be designed to service other heights.
- Can support a weight capacity of 750 pounds.
- Exclusive non-skid ramp surface is very effective even in rain, snow and icy weather conditions.

PORTABLE DELIVERY RAMP USES

There are an unlimited number of uses for Handi-Ramp's Portable Delivery Ramp. Its applications are endless, from warehouse docks, semi-trailers, and delivery vans, to pick up trucks and portable yard ramp.

Clients are using them to provide easier access to locations with multi-stair delivery challenges and to create access to a loading dock that was designed for truck loading only.

Portable Delivery Ramps can be used on semi-trailer trucks to make loading or unloading easy. This can improve efficiency when making deliveries to locations without a loading dock and eliminate the need for lift gate trucks in many situations. Portable Delivery Ramps can also be used to load pick-up trucks!

There are an unlimited number of uses for the Handi-Ramp Portable Delivery Ramp!
