

# VAN RAMP SERIES

# Handi-Ramp®

## VAN RAMPS

The Van Ramp Series from Handi-Ramp® include a wide range of ramps designed to be mounted in full size vans and some mini-vans. Van Ramps are available in 5 foot, 6½ foot and 7 foot lengths to meet your individual needs. The standard width of 26 inches accommodates most wheelchairs and vehicles. Other widths are available on a special order basis.

### THE LOW COST ALTERNATIVE TO A LIFT

The Handi-Ramp Van Ramp Series is a low cost alternative to a lift system and offers the most economical solution for wheelchair transportation available on the market today.

Our van ramps fold in half and store vertically inside your van, conserving precious passenger space.

### EASY TO USE

All of our van ramps are lightweight and can be operated with minimum effort by one person. Equipped with "shock assisted lifting," Handi-Ramp Van Ramps have been designed for easy use.

The amount of lift effort required to store our 6½ foot Aluminum Van Ramp is under 20 pounds. Non-skid surface and side safety curbs are included on all Handi-Ramp Van Ramps offering safe and easy access to your van.

### EASY TO INSTALL

All Handi-Ramp Van Ramps can be installed using our simple 3-bolt installation technique or with our **Quick Mount™** system. The Quick Mount allows you to remove and re-install the van ramp in minutes.

Van Ramp installation does not require modification to your vehicle so the resale value of your van or minivan is not affected. Portable, rear entrance ramps are also available. Please call us for further information.

The AV78 (78" long aluminum van ramp) in the side door of a Volkswagen Eurovan.

The amount of effort required to lift the van ramp is under 20 pounds making it very easy to operate.

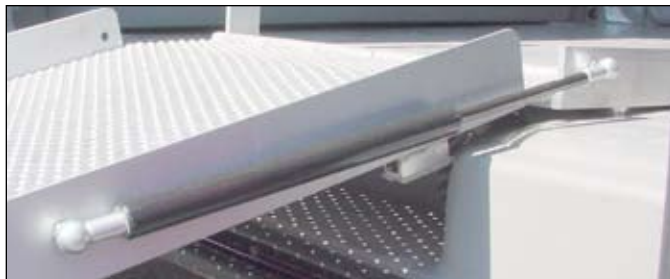

The AV84 (84" aluminum van ramp) mounted in the rear of a full size van.

Handi-Ramp®  
Since 1958

**The First Name in Accessibility Since 1958**

510 North Avenue, Libertyville, IL 60048 • Phone: (800) 876-RAMP • FAX: (847) 816-8866 • [www.handiramp.com](http://www.handiramp.com)

The custom designed shock provides assistance to reduce the lifting weight of the ramp to under 20 pounds.

**THE 4 POINT TIE DOWN**

A 4 Point Tie Down System (with Optional Lap Belt) is recommended for securing your wheelchair or scooter inside the van. The straps can attach to either individual floor plates or tracks as shown in the picture below.

**SPRINTER VAN RAMP**

Handi-Ramp also manufactures a ramp system for the Sprinter Van. These ramps have a capacity of up to 1200 pounds. They are 10 feet long and can mount in either the rear door or the side door.
