

Pool Leg Kit Instructions

SKU 228

For use with PetSTEP Folding Ramps SKU 222G and 222K

HANDIPRODUCTS®
SINCE 1958

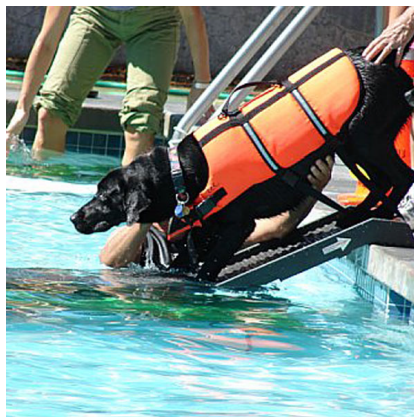

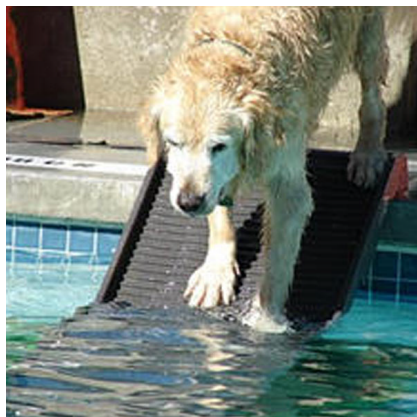

Package contents:

- 2 aluminum legs
- 8 fiddle screws
- 1 support bar that connects the legs

Instructions for use:

NOTE: Leg Kit works for pools that have between 3.5 feet and 5.5 feet from pool edge to pool floor.

1. Attach the legs to the underside of the ramp using 3 fiddle screws per leg, positioning the legs as shown.
- 2.. Line the support bar up to the screw holes. Insert fiddle screws and tighten using hands only.
- 3.. Place the ramp in your pool with the curved section on the coping or side of the pool or ramp may also be used over steps in the shallow end of your pool.
- 4.. Place the end of the ramp in the pool below the waterline to ensure that the rust-resistant legs fill with water, providing ballast and preventing the ramp from floating or bobbing in the water.
